Cookies

We use cookies (a small text file placed on your computer to identify your computer and web browser) and may use anonymous identifiers (a random string of characters that is used for the same purposes as a cookie). We use cookies and other similar technologies to analyze use of and improve This Website and the Services and as described in the Advertising and Online Tracking Section of this Privacy Policy. Most web browsers are initially set up to accept cookies. Your browser may give you the ability to control cookies or other tracking tools. How you do so depends on the type of tool. Certain browsers can be set to reject browser cookies. If you block cookies, certain features on our Website or Services may not work. If you block or reject cookies, not all of the tracking described here will stop. Some of our Service Providers may use their own cookies, anonymous identifiers, or other tracking technology in connection with the services they perform on our behalf.

This Website may provide functionality to allow you to set your cookie preferences. This functionality relies on browser cookies to store your preferences. If you are a resident of New Zealand, we may use the Nielsen//NetRatings counting system to track common entry and exit points for the Website or Services, compiling anonymous information about usage of the Website and Services, and randomly and anonymously surveying users of the Website and Services. those logged user events (such as mouse movements, clicks, page visits, scrolling, tapping, etc.) into a reproduction of what you actually did on the website or application. We use session replays for quality control, customer service, fraud prevention and security, and marketing purposes. Our session replay technology is owned and operated by a third-party who acts as our service provider. The information collected by this technology may be collected by, transferred to, and stored by our third-party service provider.

ChatBot Technology

We use chatbots to help provide customer service and support, including through the use of a virtual assistant. A chatbot is a software application that mimics human conversations in text or voice interactions on our website or through our customer service hotline. It enables the communication between a human and a machine, which can take the form of messages or voice commands. The chatbot is designed to work without the assistance of a human operator. It responds to questions posed to it in natural language as if it were a real person using a combination of pre-programmed scripts and machine learning algorithms. When asked a question, the chatbot will answer using the knowledge database that is currently available to it. If the conversation introduces a concept it isn't programmed to understand; it will pass it to a human operator. If you use our chatbot service, we will collect any Personal Information you provide to us. We will also create and store a transcript of your chat interaction with us which will be shared with and stored by our third-party service provider. We use these transcripts and the information you provide for quality control, customer service, fraud prevention and security.

Advertising and Online Tracking

We may place advertisements and allow third-party companies to serve ads and collect certain information when you visit this Website or use the Services. These companies may use certain information (e.g. click stream information, web browser type, time and date, subject of advertisements clicked or scrolled over) during your visits to this Website and other websites in order to provide advertisements about goods and services likely to be of interest to you (i.e., for cross-contextual behavioral advertising). These companies may also collect information about your activities on our Website on your current device and combine it with information about your activities on other websites, mobile apps, and devices. These companies typically collect such information using server logs, cookies, web beacons, tags, pixels, mobile advertising IDs (such as Facebook cookies or Google's Advertising ID), cross-device linking, and similar technologies. They may match your browsers or devices if you log into the same online service on multiple devices or if your devices share similar attributes that support an inference that they are used by the same person or household. This means that information about your activity on websites or apps on your current browser or device may be combined and used with information collected from your other browsers or devices. These third party partners use this information for our and their own advertising, analytics, attribution, and reporting purposes. Our systems do not recognize browser "Do Not Track" signals, but several of our Service Providers who utilize these cookies on this Website enable you to opt out of targeted advertising practices. To learn more about these advertising practices or to opt out of this type of advertising, you can visit www.networkadvertising.org or www.aboutads.info/choices/ (for US residents), or <https://youradchoices.ca> (for Canadian residents) or <http://www.networkadvertising.org/understanding-online-advertising/what-are-my-options>.

Some browsers or browser extensions also allow you to tell websites not to share your information for cross-contextual behavioral advertising through the "global privacy control" signal. We will respond to this signal in a frictionless manner. If you configure this setting on your browser, certain features on our site may not work and you will receive less targeted advertising.

Options you make are device specific.

Residents of some jurisdictions (e.g., California, Virginia, Colorado, Montana) have the ability to opt out of cross-contextual behavioral advertising through other means. Please see the Right to Opt-out of Sale or Sharing section below.

You should review the privacy policies of these Third Party Platforms before interacting with them.

For example, our Yellow Pages website located at <https://www.yellowpages.com.au/> ("**Yellow**"), uses YouTube™ API Services. [CORPORATE.THRYV.com](https://corporate.thryv.com)

[THEREALYELLOWPAGES.com](https://www.therealyellowpages.com)

Note that we will only apply the request to that specific device or browser and only for cookie or pixel based selling and sharing. Thus, you will need opt out on each browser and device where you use our services. If you clear your cookie history on a particular browser or device, your opt out request will no longer be saved.
